On April 16, 2011, Salter Labs® participated in the American Lung Association's Fight for Air Walk in Bakersfield, California. Over 160 members strong, Salter Lab's® 5K walk team consisted of Salter employees, their families and friends. Together, the team raised over \$ 4,300 in their first year of participation, exceeding their goal by 172%, and earning recognition by the American Lung Association as the second highest in overall donations. We consider it an honor to support the American Lung Association's commitment to preventing lung disease and promoting lung health, and we had fun doing it.

It is a privilege to work in healthcare where our products improve the quality of life for persons with chronic lung disease. We are committed to serving the community and our customers who care for patients.
